

Welcome To The Future Of Claims Assessment

i-Investigate®

i-Investigate® provides Insurers with innovative claims investigative solutions all interwoven into one service. Building a working relationship with the claimant, we successfully identify risk, gather only pertinent and focused evidence, protecting your best interests and that of your genuine customers.

Our fresh and thorough approach utilises major-crime best practice to ensure our investigations are fully comprehensive and compliant. All investigations are carried out in a necessary, reasonable and proportionate manner and is fully supported by our i-Detect® findings. All i-Cog investigations are intelligence led and never the subject of unnecessary or substandard returns that can often be experienced in the industry. We pride ourselves on our stringent internal quality assurance.

As expert claims investigators, our quality is demanding, ethics upstanding and findings outstanding - we always have the integrity of the investigation as our priority, as we do the customers' journey.

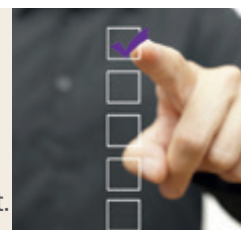

i-Investigate®

Investigation Portfolio

- ✓ Income Protection Claims
- ✓ Personal Injury Claims
- ✓ Disability Claims
- ✓ Liability Claims
- ✓ Casualty Claims
- ✓ Household Claims
- ✓ Travel Claims
- ✓ Pet Claims
- ✓ Commercial Claims
- ✓ Specialist Photographic, TV & Media Claims

Benefits

In 87% of instructions we identify fraud, policy breaches and reasons for successful declinature. The remaining 13% are carefully managed withdrawals. In addition, our investigators are also trained in the i-Verify® conversation management techniques that are fully utilised during all investigative interactions, treating all customers with dignity and respect.

Every investigated case we have referred to the police has been successful in either charge or conviction. Due to our close law-enforcement contacts, we completely remove the burden from clients with our expert knowledge in compiling court files and exhibits.

Welcome To The Future Of Claims Assessment

i-Observe®

i-Observe® delivers to insurers market leading and legally compliant surveillance services with a fixed fee approach that satisfies time after time. The i-Observe® team consist of only the best dedicated, hand-picked, ex-military, government and police personnel, with every case led by only the most up to date intelligence.

The proportionate use of surveillance can dramatically reduce claims liability and protect your business. Gaining an accurate visual account of the real claim circumstances is sometimes all that stands between settlement and declinature.

Combining the latest technology and our dedicated editing suite, we maintain confidential case management at all times.

All instructions are conducted to the highest legal, ethical and regulatory standards including compliance to the Regulation of Investigatory Powers Act 2000 (RIPA). Ongoing investment and rigorous training are key to the superior delivery of all i-Observe® claims back to clients.

i-Cog's experienced case managers oversee every instruction, quality assure continuously for compliance and ensure completion is timely and evidentially well-constructed.

i-Observe®

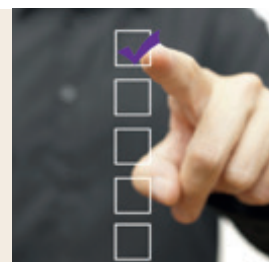

🔍 Our Portfolio includes, but is not limited to:

- ✓ Liability Claims
- ✓ Income Protection Claims
- ✓ Personal Injury Claims
- ✓ Casualty Claims

Benefits

We pride ourselves on being intelligence led at all times which leads to the capture of positive footage for clients in 95% of cases. Our approach also ensures total productivity, reduces investigative timescales and secures the right result much sooner than expected.

Welcome To The Future Of Claims Assessment

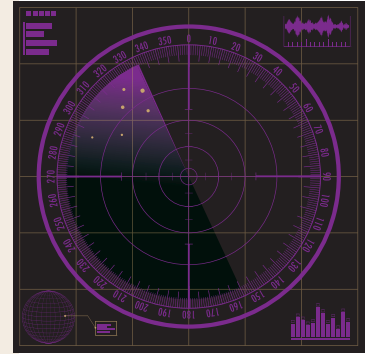

i-Detect®

The i-Detect® System has been developed by i-Cog to rapidly detect risk triggers and fraud at both underwriting and claim levels.

Without leaving a footprint, all claims, not just those of concern, can be cleansed for risk triggers against Insurer's exact and tailored criteria. These customised 'rules' ensure all outcomes are bespoke to the client and aligned to their own environment, processes and risk tolerance.

Claims that are flagged after initial system inspection are passed to an intelligence researcher for assessment against the Insurer's set policy and claims criteria. Within 48 hours your claims handlers will be presented with a detailed, yet simple, risk trigger report outlining findings, detected anomalies and evidenced recommendations.

£ Benefits

- ✓ Average claim saving of £54,000 (all lines)
- ✓ Accurately identifies policy and claim risk that would otherwise have been missed
- ✓ Low-cost with fixed pricing to ensure total transparency
- ✓ Speed of return
- ✓ Depth of reporting with a before unseen thoroughness
- ✓ No footprints
- ✓ System and human interaction

- ✓ Best system sources available on the market
- ✓ Gives claims handlers the live evidence to challenge suspicious claims
- ✓ Accelerates genuine claims back to the insurer for action
- ✓ Claim does not need to be a concern before washing through i-Detect®
- ✓ System can be used at policy inception, FNOL or after claim notification
- ✓ Acts as a perfect platform for the sister i-Option® methods of revolutionary claim validation

📷 A Snapshot

The system is not prejudiced to any claim type – all policyholders and all claims can be cleansed for risk against exact criteria for each insurer.

During a recent pilot study, 301 household and travel claims from 4 Insurers were subject to i-Detect®. All of these claims were historical and had recently been settled by the Insurers directly. The system output resulted in the following:

Recommended Decline = 65
(Total saving would have totalled = £75,473)
Concerns Present = 137
Proceed to Settlement = 99

Users of the i-Detect® System are currently placed in the most competitive position within the market when it comes to identifying concerns, understanding their customers and accurately identifying who they are taking on as an insurable risk.

Interested In Learning More? i-Cog would be delighted to offer interested clients a proof of concept for i-Detect® to wash an historic claims sample to demonstrate the potential savings that could have been generated.

Welcome To The Future Of Claims Assessment

i-Verify®

i-Verify® takes our Conversation Management Model to another level altogether and has now been developed even further following 12 months of psychological research and investment. i-Verify® establishes the authenticity of a claim based on numerous cognitive, behavioural, verbal and human levels simultaneously. It is the most advanced approach to date.

All our techniques are undetectable to the customer, providing even better customer service satisfaction than ever.

Regardless of the context, if a person is telling the truth i-Verify® will consistently be able to test their recall and make this determination. Not only that, the process will also identify the level of deception and possible motives for it. And to the customer, it is just a simple claims call.

The Science

So how do we establish if the claim presented is a true-event?

All people lie differently, some are more successful than others and there is no one constant we can use to determine a liar from a truth-teller.....or is there?

When any one of us experiences a real event, our sensory memory subconsciously retains what we saw, heard, smelt and felt – it is proven as our one reliable constant.

Our award winning techniques are based on claimants having to spontaneously respond to innocuous questions that seem so natural to ask, but are in fact thoroughly testing recall from either the sensory or working memory, separating the liar from the truth-teller.

i-Verify®

The Benefits

- ✓ An average £14.20 saved on every £1 spent with us
- ✓ 0.4% unprecedented low complaint rate
- ✓ 38% recommended declinature
- ✓ 42% customer withdrawal rate

Now you see how the i-Detect® and i-Verify® relationship is a match made in heaven when it comes to risk assessing insurance claims fairly and ethically.

i-Verify® is implemented on both a DA and non-DA basis and is an interwoven ingredient in our claims DNA.
