

STRATEGIC INTELLIGENCE | DUE DILIGENCE

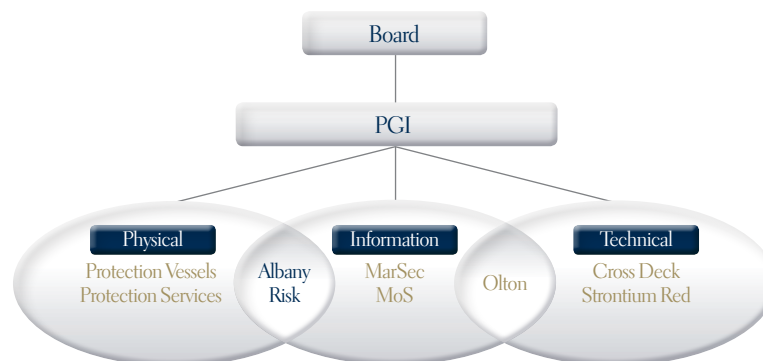

.....
Insurance Services
.....

{ We strive to be modern and adaptable in our approach, innovative and market leading with our solutions. We are honest and factual in our reporting, credible and timely for our clients

The Company

ALBANY RISK is a strategic intelligence and risk-management company. We enable our clients to mitigate risk, on a global scale, in an ever more complex and evolving world. Being an integral part of Protection Group International, a company committed to protecting personnel, assets, profits and reputation, gives Albany Risk the infrastructure and support of a group but

the individuality needed to accommodate each client's individual requirements. By building partnerships and creating tailored solutions, we will enable you to make critical decisions relating to complex problems. With ongoing support and the use of our infrastructure we will give you the confidence to manage and grow your business in demanding environments.

Online Research and Analysis (ORA)

We provide an online research facility that focuses on quality information retrieval, validation and analysis. Our highly trained team will search for the most relevant information that links to your customer and produce an online intelligence assessment. Our product is not a list of links to websites but quality intelligence to help your business identify risk, customer activity and assist in the development of claims management action plans.

{ Every two days, we create as much information as we did from the dawn of civilization up until 2003.

Eric Schmidt, then the CEO of Google, at a conference in 2010

How ORA Works

Our specialist software automatically searches the deep web and subscription databases to collate all the relevant information to be presented to the analyst.

ALBANY RISK Insurance Services

Fraud Management

ALBANY RISK provides a unique service that sets it apart from the rest of the field, by not only utilising highly trained and rigorously vetted field operatives, but also our unique in-house intelligence team that conducts targeted data-based research. This will provide the client with a due diligence report on the claimant's online profile. This is disseminated to the teams on the ground so the surveillance operation is more targeted. This not only provides the client with a full online report but physical confirmation too.

Social Profile Monitoring (SPM)

ALBANY RISK, through its bespoke software, can monitor customers' social profiles. Albany Risk has the capability to alert you on status changes, tweets, posts and blogs etc. This will give you information on the customer's online lifestyle and movements.

Integrity Reports

ALBANY RISK provides evidence-based analysis of a Subject (natural person or company) in order to identify any undue regulatory, compliance or professional risks posed by association to the client in working directly with, or accepting, the Subject as a partner. We will deliver context and analysis of concerns whilst immediately identifying red flag issues.

Financial Crime/Organised Crime

ALBANY RISK utilises our specialist software to scour the deep web and social networks complemented with human intelligence to build an extensive organised crime map. A specialist team of investigators will then use the intelligence gathered in direct conjunction with the client's in-house fraud team to confirm and identify the relationships between individuals involved with a claim and criminals who specialise in fraud. It will provide a clear picture of the key players, their associates, movements, assets, internet profiles and any further relevant information to the investigation. This service expands the clients' capabilities to monitor, identify and confirm relationships between claimants and appreciate the intricate well structured nature of financial/organised crime.

{ The Insurance Fraud Bureau (IFB) now believes that up to 1,000 criminal gangs are operating in the UK.

ALBANY RISK Insurance Services

Physical Surveillance

ALBANY RISK has the latest in covert technology, which is often unavailable outside of government circles. This service offers the industry-standard 16 hours of surveillance. However, Albany Risk understands that additional hours and days may be required, along with weekend and bank holiday work; this comes as a standard service to the client.

Compliance And Risk Management

ALBANY RISK can provide extensive intelligence on the day-to-day activities of your global business partners/associates, politically exposed people (PEPs) and agents on how they conduct themselves, their business, and with whom they are associated. This would involve reviewing propriety and industry-related open-source databases offering extensive cover of international media publications, news sites, international corporate directories, legal cases, regulatory and sanctions registers. This material would then be complemented by targeted human intelligence to identify and assess any credible information.

Albany Risk can also continue to monitor/review these entities to ensure that standards are maintained in the future.

Reputation Risk

ALBANY RISK currently provides a Compromise Response Plan (CRP) to its clients. This has been produced with the input of specialists from several departments within Protection Group International (PGI), including legal, HR, communications and senior management. The CRP can be adapted to any situation and to each client to match their specific areas and levels of risk.

{ A reputation that took decades to build can be threatened by a single event.

Corporate Investigation

ALBANY RISK can provide a rapid-response team of highly skilled corporate investigators to travel at short notice and conduct extensive post-incident investigations. The team will be supported by our in-house legal and communications departments to assist with all legal and PR issues, ensuring that any incident would be dealt with swiftly and with a focus on safeguarding the client's reputation and resuming operations as quickly as possible.

Ethics

ALBANY RISK is part of Protection Group International Ltd. We pride ourselves on providing impartial information and advice that is independent of any political or commercial pressures. We routinely handle sensitive information whilst preserving the highest level of confidentiality. We comply with all national laws relating to privacy and the collection and dissemination of data and personal information. Our ethos is to ensure that our clients comply with anti-corruption laws, not break them.

We believe in a principled business that operates to the highest ethical and legal standards. Our operatives and analysts are provided with training and required to fully observe the law in each jurisdiction in which they operate. Albany Risk does not provide security services to any governments or retain government officials that may compromise our independence or present a corruption risk. Our reports are overseen by our in-house legal team and when required a lawyer from the appropriate jurisdiction.

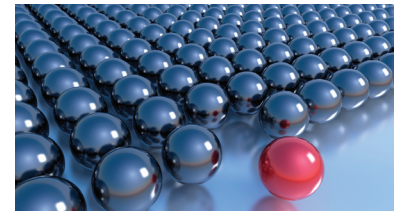

The UK Data Protection Act

The Data Protection Act was enacted in the UK in 1998 to protect the rights of individuals to control the gathering, retention and use of their personal data. Albany Risk is registered under the Act and has put in place the necessary procedures to ensure that our business is compliant with the requirements of the Act.

Key Points

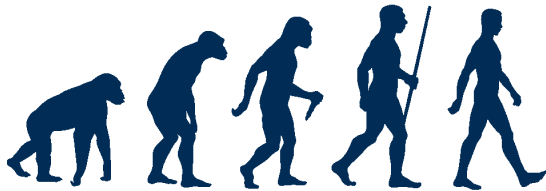

- Flexible pricing structure to suit volumes

Pricing

ALBANY RISK prefers to work on a fixed fee. This gives you a fixed-price solution to get the best results. We can also offer flexible pricing to work within your budgets and time constraints. By offering this flexibility it allows you to hit your targets and meet monthly or quarterly financial budgets. This is a bespoke service and discussed on a volume basis with each client.

In a world where obtaining relevant information is becoming more complex, Albany Risk will keep you informed and one step ahead.

{ It is not the strongest of the species that survives,
nor the most intelligent that survives.
It is the one that is the most adaptable to change.
