

Who are we?

We are a leading **vocational rehabilitation provider** specialising in long term conditions, helping people **to improve their health** and wellbeing, self manage their symptoms and **remain in or return to, work**.

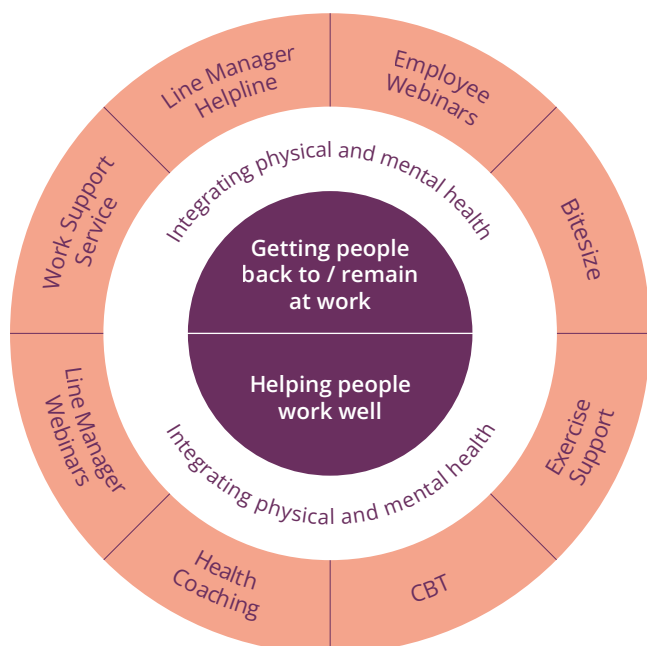

We have an in-house team of health professionals: Chartered Psychologists, Occupational Therapists, Physiotherapists, CBT therapists & dietitian, who are fully trained to work as clinical health coaches and in vocational rehabilitation for people with cancer and chronic conditions.

What do we do?

We help people to self-manage their condition to further help them remain in, or return to, work. This can include assessments, clinical health coaching, specific exercise support for long-term conditions, phased return to work planning and line manager engagement and training. Within our team, we have professionals who are skilled in both long-term conditions and can also offer additional support for CBT, dietetic advice and support for people who are neurodivergent.

What conditions do we manage?

- Cancer
- Long Covid
- Stroke
- Chronic Fatigue
- Respiratory Conditions
- Chronic pain
- Mild to moderate mental health problems
- Menopause
- Diabetes
- Neurological Conditions
- Heart conditions
- Rheumatological conditions

Vocational Rehabilitation:

We provide work support to help people build confidence to remain in, or return to, work.

Line Manager Support:

We give line managers the tools to help support their employees through our line manager assistance programme.

Bitesize Wellbeing Sessions:

We'll dedicate bite-sized interactive webinars that help you and your work force up-skill and be more productive in your working week.
