

Claims Services

How can we help...

We can provide a complete claims management service that includes but not limited to:-

- Training
- Individual assessor audits and development
- Protocol development
- Consultancy

Why use 3D Risk Solutions?

We understand that most companies are dependent on a small number of senior employees. Our services are designed to assist the management team in the more specialised time consuming tasks.

Claims Management Services

Training

We offer both bespoke in house training courses along with 2-4 day residential courses. All courses can be tailored to different levels of experience in all products.

Individual assessor audits and development

Our assessor audits are designed to offer a consistent approach to auditing allowing us to benchmark your assessors against assessors with a similar level of experience in the market. They are also designed to provide personal development and training plans for each individual.

Protocol development

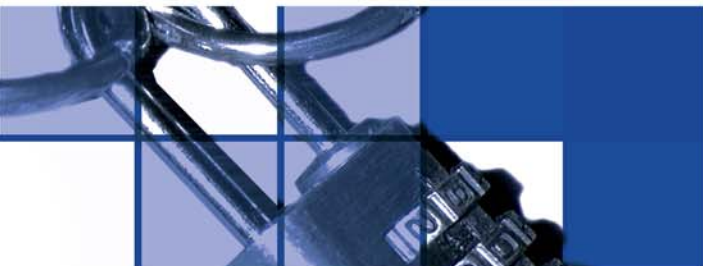

Our protocols offer a consistent approach to claims management. They are particularly relevant for large teams and new assessors.

Consultancy

Process mapping, existing product development, new product development and portfolio are a selection of the additional services we have been involved with on behalf of our clients.

We're here for you...
