

INSURANCE
Fit4U

Current Issues

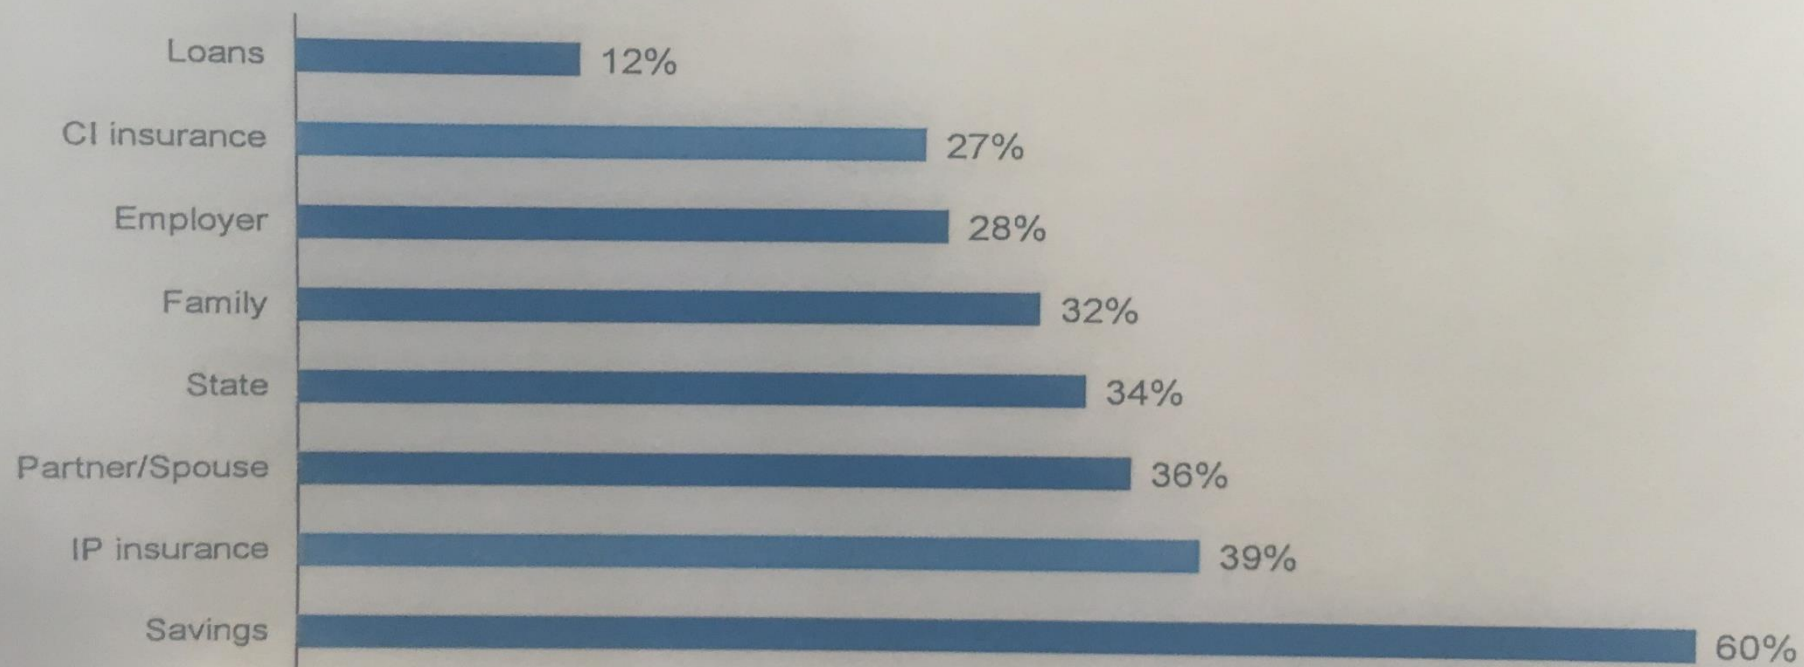

- ▶ Irrelevant to younger people
- ▶ Perception of insurance companies being untrustworthy
- ▶ Overcomplicated application process
- ▶ Perception of insurance being too expensive
- ▶ Not an instant decision
- ▶ Bloated critical illness product – over 30+ conditions

Reasons why not

Current Issues

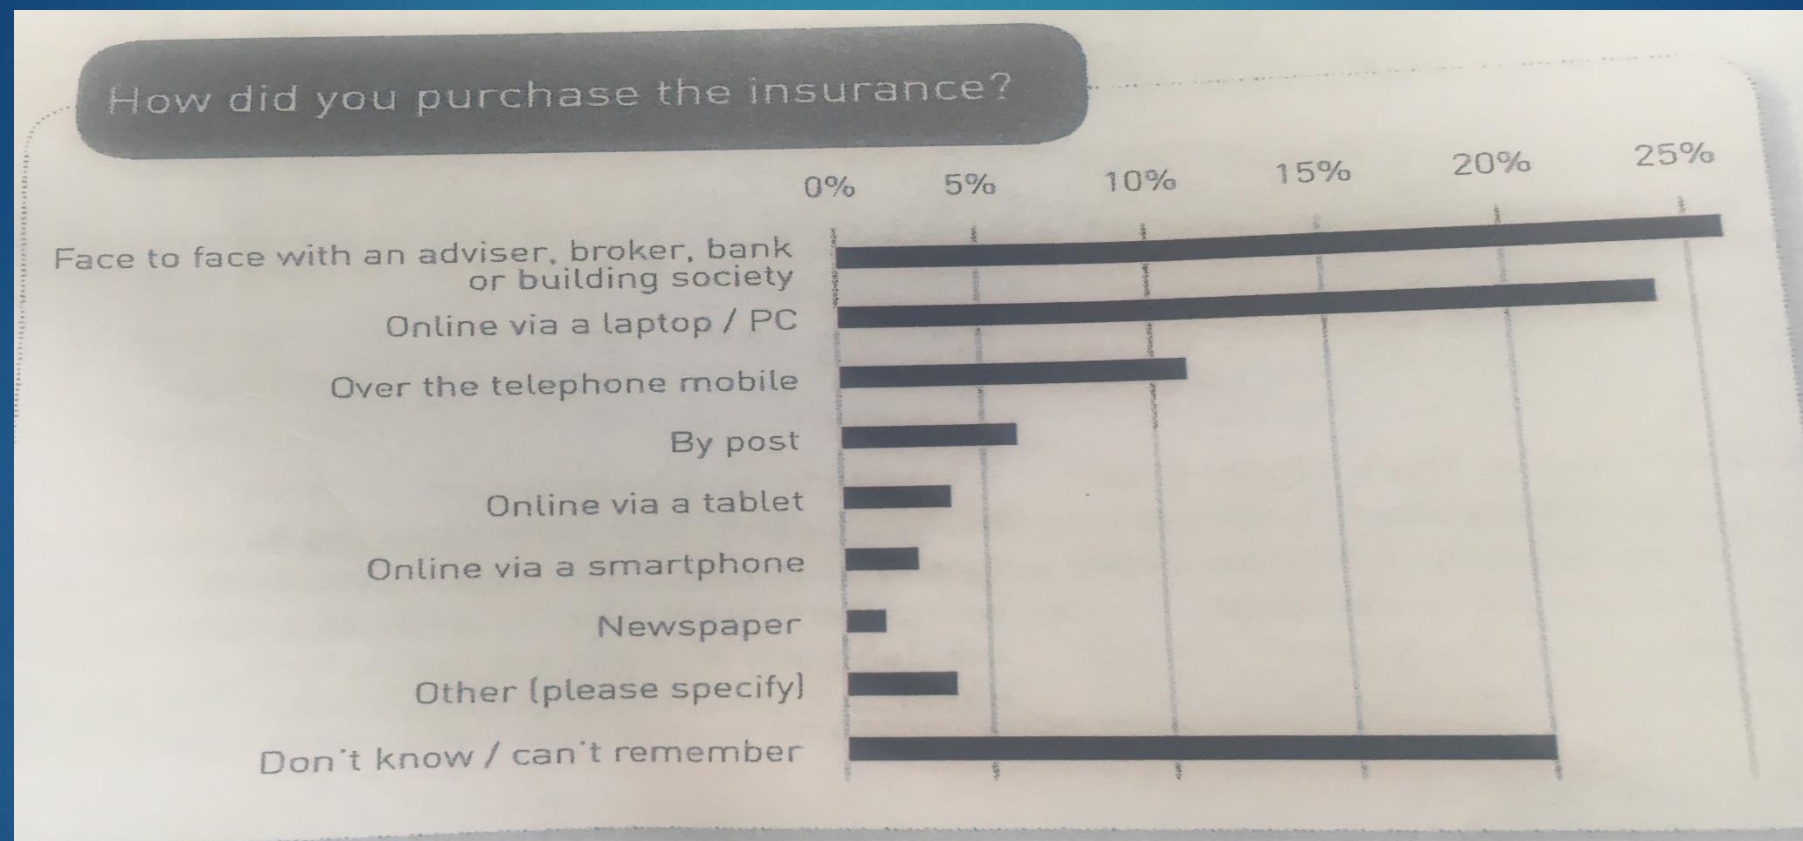

What would be most useful if you were unable to work for more than six months due to illness or injury?

The product – Fit4U insurance

- ▶ Simple, transparent, cheap product aimed at younger people
- ▶ Aimed specifically at 21-40 year olds
- ▶ Offer cover for **3 conditions**: Cancer, TPD (Own Occ), MS, and **Life**
- ▶ We consider these conditions to be the most relevant to this younger market
- ▶ Cheaper than traditional CI products currently in the market which cover more conditions
- ▶ Upper limit on sum assured – in order to keep underwriting process simple

Distribution channels

Distribution Channels

- ▶ 2 primary methods of distribution
- ▶ Sold via traditional IFAs using the automated underwriting engine Underwrite Me
- ▶ Sold direct to consumer through digital platforms eg. Facebook, Twitter

Direct to consumer journey

- ▶ Advertising through social media
- ▶ Clicking on advert will take customer through to online underwriting journey
- ▶ Standard responses will lead to buy now option
- ▶ Non-standard responses will lead to more questions
- ▶ This will lead to either a buy now option (with appropriate rating on premium) or a decline
- ▶ No option to be referred on for further underwriting
- ▶ This is to keep the underwriting journey as straightforward as possible for the consumer

IFA journey

- ▶ More traditional process
- ▶ Use UnderwriteMe as an automated underwriting tool

Marketing the product

- ▶ **Cheap** – by removing most critical illness conditions (specifically heart attack and stroke), we are creating a product that is significantly cheaper than traditional critical illness products
- ▶ **Simple** – product is simple and easy to understand. Underwriting journey is simple, leading to either a buy now option or decline
- ▶ **Alternative to savings** – more of a potential financial return

Pricing

- ▶ The simplicity of the product itself makes it significantly cheaper
- ▶ Both channels have costs: pay per click advertising on Facebook, and commission costs to intermediaries
- ▶ £0.25 per click on Facebook. Assuming 5% conversion rate, this is equal to £5 extra premium on the policies that do get written

Claims Process

- ▶ Online claim form
- ▶ Could be prepopulated from log in
- ▶ They receive call back
