Touch + Pain Quiz Questions

Round 1

General Touch + Pain Trivia

General Touch + Pain Trivia

Question 1

What word, ending in “–dynia”, describes a symptom whereby non-painful stimulus (eg light touch, movement or temperature) are experienced as pain?

General Pain Trivia

Question 2

True or False:

Pain only occurs when you are injured.

General Pain Trivia

Question 3

Which of the following are significant predictors of chronic pain?

(Scoresheet: list the numbers of any that apply)

- 1) Older age
- 2) Being female
- 3) Poor housing
- 4) Type of employment

Round 2

Medical Management

Medical Management

Question 1

What L (or, “A.L”) describes the system used by healthcare professionals to incrementally increase a patient's pain control medications according to standardised steps?

Medical Management

Question 2

Which of these medications is NOT recommend by NICE as first choice medication for neuropathic pain (choose 2):

(excluding treatment of trigeminal neuralgia)

- a) Amitriptyline
- b) Morphine
- c) Duloxetine
- d) Tramadol
- e) Gabapentin
- f) Pregabalin

General Pain Trivia

Question 3

Which medication, used to treat pain as well as many other symptoms, is derived from the Willow Tree?

Round 3

Pictures

Pictures

Question 1

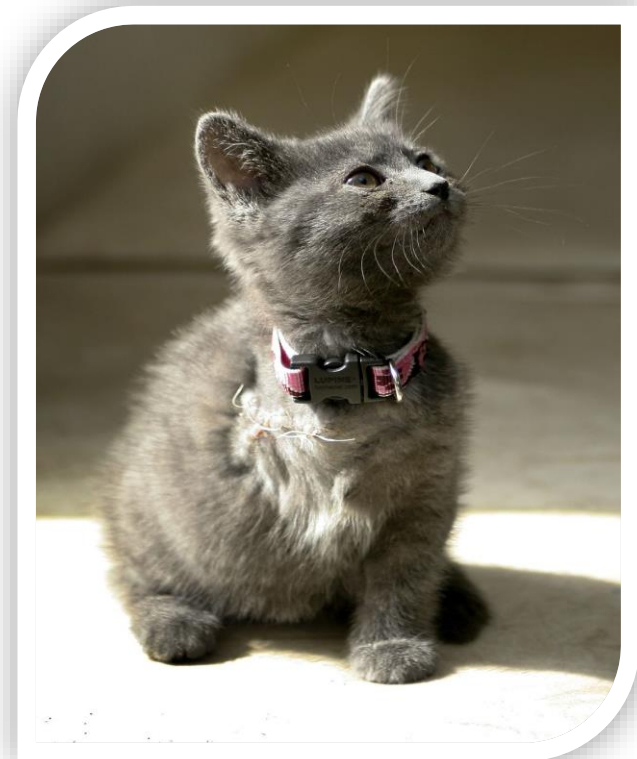

Which Pain Syndrome is this?

Pictures

Question 2

If this kitten was a human being, what type of pain might it have?

Pictures

Question 3

This machine is used to manage pain. What is it called?

Pictures

Question 4

Which part of the brain does this image represent?

Round 4

Pain Management

Pain Management

Question 1

True or False:

Acupuncture is recommended by NICE as a treatment for low back pain.

Pain Management

Question 2

Which commonly used treatment for chronic pain does this model represent?

Pain Management

Question 3

Which of the following are NICE Guidelines:

- a. Osteoarthritis: care and management
- b. Complex Regional Pain Syndrome: care and management
- c. Neuropathic pain in adults: pharmacological management in non-specialist settings
- d. Fractures (non-complex): assessment and management
- e. Chronic pain in adults: non-pharmacological management

A point for every correct one but NO POINTS AT ALL if you add any that are incorrect!

Pain Management

Question 4

Which factor is more important when predicting **pain disability level** in someone experiencing low back pain:

- a) MRI and other imaging findings
- b) Psycho-social factors

Answers...

Round 1

General Pain Trivia

General Touch + Pain Trivia

Question 1

What word, ending in “–dynia”, describes a symptom whereby non-painful stimulus (eg light touch, movement or temperature) are experienced as pain?

General Pain Trivia

Answer 1

Allodynia

- Ancient Greek for “other pain”
- Can be triggered by:
 - Light touch (Static mechanical allodynia)
 - Stroking lightly (Dynamic mechanical allodynia)
 - Temperature (Thermal allodynia)
 - Movement (Movement allodynia)

Common feature in many pain conditions including migraine, fibromyalgia, CPRS as well as instances of nerve damage.

General Pain Trivia

Question 2

True or False:

Pain only occurs when you are injured.

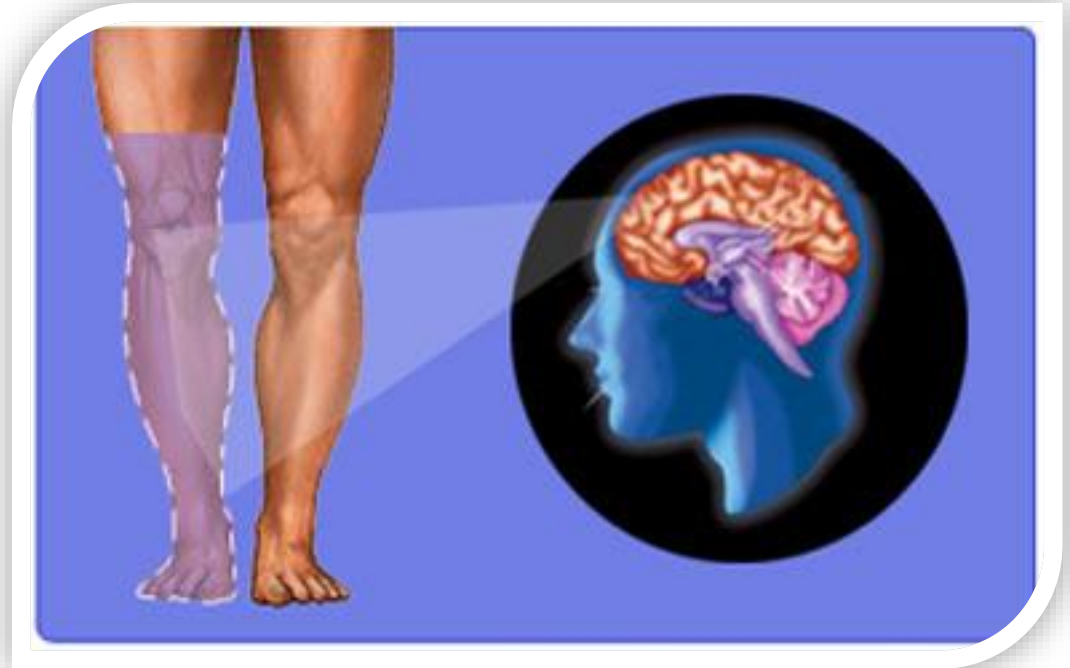

General Pain Trivia

Answer 2

False:

The pain response is highly complex and can persist after injury has healed (or even after leg removed)

General Pain Trivia

Question 3

Which of the following are significant predictors of chronic pain?

- 1) Older age
- 2) Being male
- 3) Poor housing
- 4) Type of employment

General Pain Trivia

Answer 3

- 1) Older age
- 3) Poor Housing
- 4) Type of employment

British Pain Society Audit 2012

Round 2

Medical Management

Medical Management

Question 1

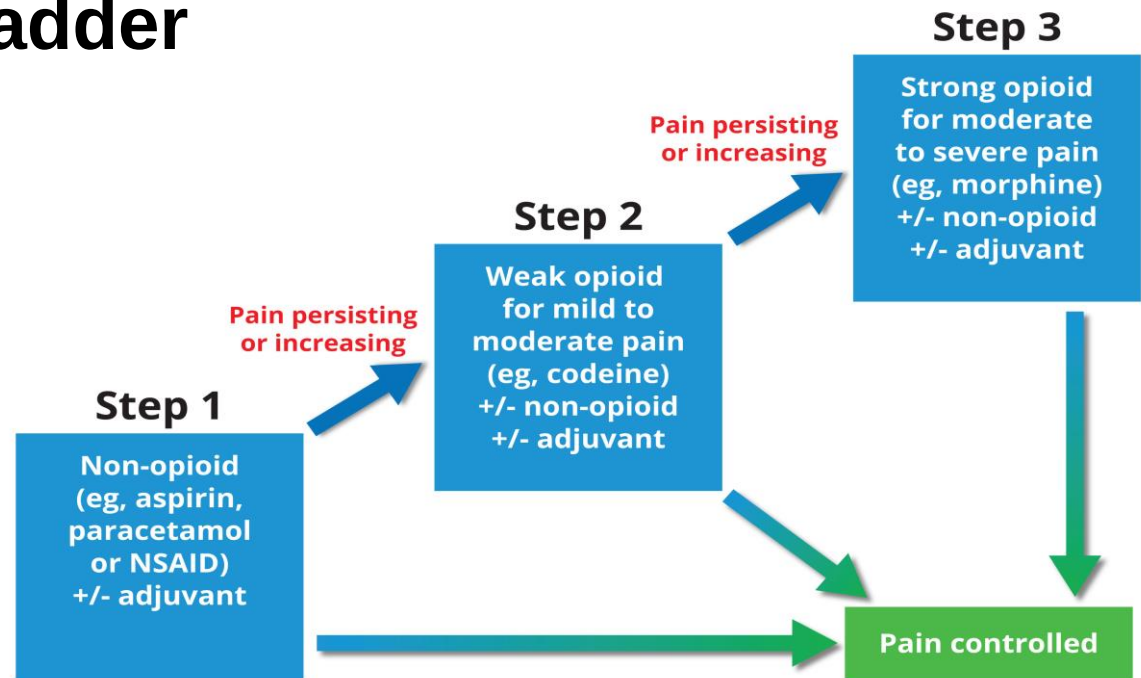

What L (or, “A.L”) describes the system used by healthcare professionals to incrementally increase a patient's pain control medications according to standardised steps?

Medical Management

Answer 1

The Analgesic Ladder
