Williams Independent Medical Examiners (WIME*) was established in 1995 to meet the growing demands of the income protection market in the provision of independent medical examinations and reports – otherwise known as IME’s.

We aim to provide our clients with an efficient and reliable service unrivalled in the market. We work with most of the major insurance companies and their legal advisers.

A specialist team

The provision of IME’s is facilitated by approximately 500 Consultant medical and surgical specialists around the UK and Northern Ireland. Their credentials have been carefully scrutinised including their GMC registration, up to date MDU/MPS membership and of course, an ability to provide objective reports within an agreed time span.

Objective and impartial

WIME have extensive experience in the Income Protection market which is distinct from the compensation claims industry. As a result, we have developed a special area of interest and understand the unique differences and anomalies which exist in IP and associated policies. In particular, our Consultants assess claimants against their ability to perform their insured occupation and return to work and suggest treatment programs to restore them back to full health.

Independent Medical Examination and Reports

We currently work with the majority of UK insurance companies in the provision of medical reports based on objective medical evidence and impartial opinions. This is achieved through either physical and/or mental examination of each claimant and a comprehensive review of their medical records and any other relevant information with which we may be provided.

Speed of service

We aim to provide appointments for claimants within 4 weeks of receipt of either the claimant’s medical records or a signed and appropriate consent form, which allows us to apply for them on our clients behalf. A report is usually produced within 3 weeks of the assessment taking place pending any outstanding medical records or further investigations that may have been carried out at the time of the assessment.

Independent

We do not advertise for our Consultant Specialists and we do not necessarily accept those who apply directly to us. Most of our Consultants have been appointed through recommendation, usually by a colleague. Our experts are chosen for their ability to comprehensively examine each claimant as well as any other evidence provided and to subsequently produce reports within a specified period in an appropriate format for an agreed fee.

Quality of service

We follow stringent procedures to ensure our services and reports always provide the following:

- A fair and objective account of events.
- Comprehensive answers to the questions raised in the letter of instruction.
- Prompt appointments.
- Quick report turnaround times.
- Strong working relationship with our clients and Consultant Specialists.
- A competitive fee structure.

All our Consultants recognise the need to provide clarity and definitive opinions based on objective medical evidence.

Report Review Forms are attached to every report for completion by our clients to provide important feedback. This information is sent to our Consultants every month to make sure we maintain consistently high standards of reporting.

Our unique style of critiquing the reports to ensure objectivity and impartial views has been developed over many years of experience in dealing with these types of claims. We regularly challenge our Consultants regarding the content of their draft reports, wherever necessary, in order to clarify issues and to ensure the report is fair and unambiguous. If further information later becomes available, our Consultants are pleased to provide their additional comments accordingly.

File Reviews

Where a medical examination is either inappropriate or not possible, we also provide a file review service. This is where a Consultant Specialist will review the contents of a file and prepare a report giving their opinion on the facts contained within.

File reviews are costed on a case by case basis, dependent upon the volume and clarity of records.

Medical Records Sorting and Summary Reporting Service

We also employ a number of qualified nurses who provide a medical records sorting service. Records are either provided to us or we apply for them on behalf of our clients, with the patient’s written consent. Full or partial records are then sorted into appropriate categories such as handwritten notes, typed correspondence, investigations etc. and paginated. Each entry is logged, including dates and reasons for attendance and a page reference for further information. The report is completed with a summary of the contents.

We interpret the handwritten records and provide explanations wherever possible and we clearly state where we might have had difficulty in doing this to avoid any misunderstandings.

Our turnaround times are within 2 – 3 weeks of receipt of medical records and we charge a negotiable hourly rate plus the costs of the retrieval of the records.
