

Technical Assessment

CLAIMS CONSULTING

Struggling to meet SLA's due to a shortage
of experienced Claims Assessors?

Contract claims assessment

Income Protection is constantly at the heart of HCB's activities. We have experience in all aspects of this product, but our core strength is claims.

We support claims departments by supplying claims assessors to cover operational strain; maternity leave and periods of high activity.

We are proud to be the longest established providers of this service and are able to offer expert claims assessment in all protection health care product lines including group and individual income protection, critical illness, TPD and ill health early retirement claims.

Advantages

- ✓ Ease operational strain
- ✓ Support as and when needed
- ✓ Expertise gained from years in the business
- ✓ Cost effective solution

Third party administration

HCB's expertise in claims management underpins our ability to manage blocks of claims. This could be:

- ✓ Legacy books of IP claims
- ✓ Run-off portfolios
- ✓ Staff schemes
- ✓ Self-insured IP
- ✓ Small closed books of protection products needing policy administration

Claims consulting modules

In partnership with disability insurance professionals from around the world, we have built and implemented claims consulting modules to ensure the claims process, strategy and philosophy are aligned with a company's individual strategy.
