The impact of COVID-19 on IP Claims

Monica Garcia BSc, MSc. Health Psychology
Health and Wellbeing Insurance Consultant

Agenda

1

Introduction

Overview of key COVID-19 health and wellbeing issues, currently impacting the working population, and the risks associated to the IP claims landscape.

2

Discussion of key factors and case studies

The Furloughed scheme, unemployment, remote working, mental health impact, and case studies.

3

Claims Assessor role - discussion

Challenges in the assessment of new claims, identifying risk factors and duration management strategies.

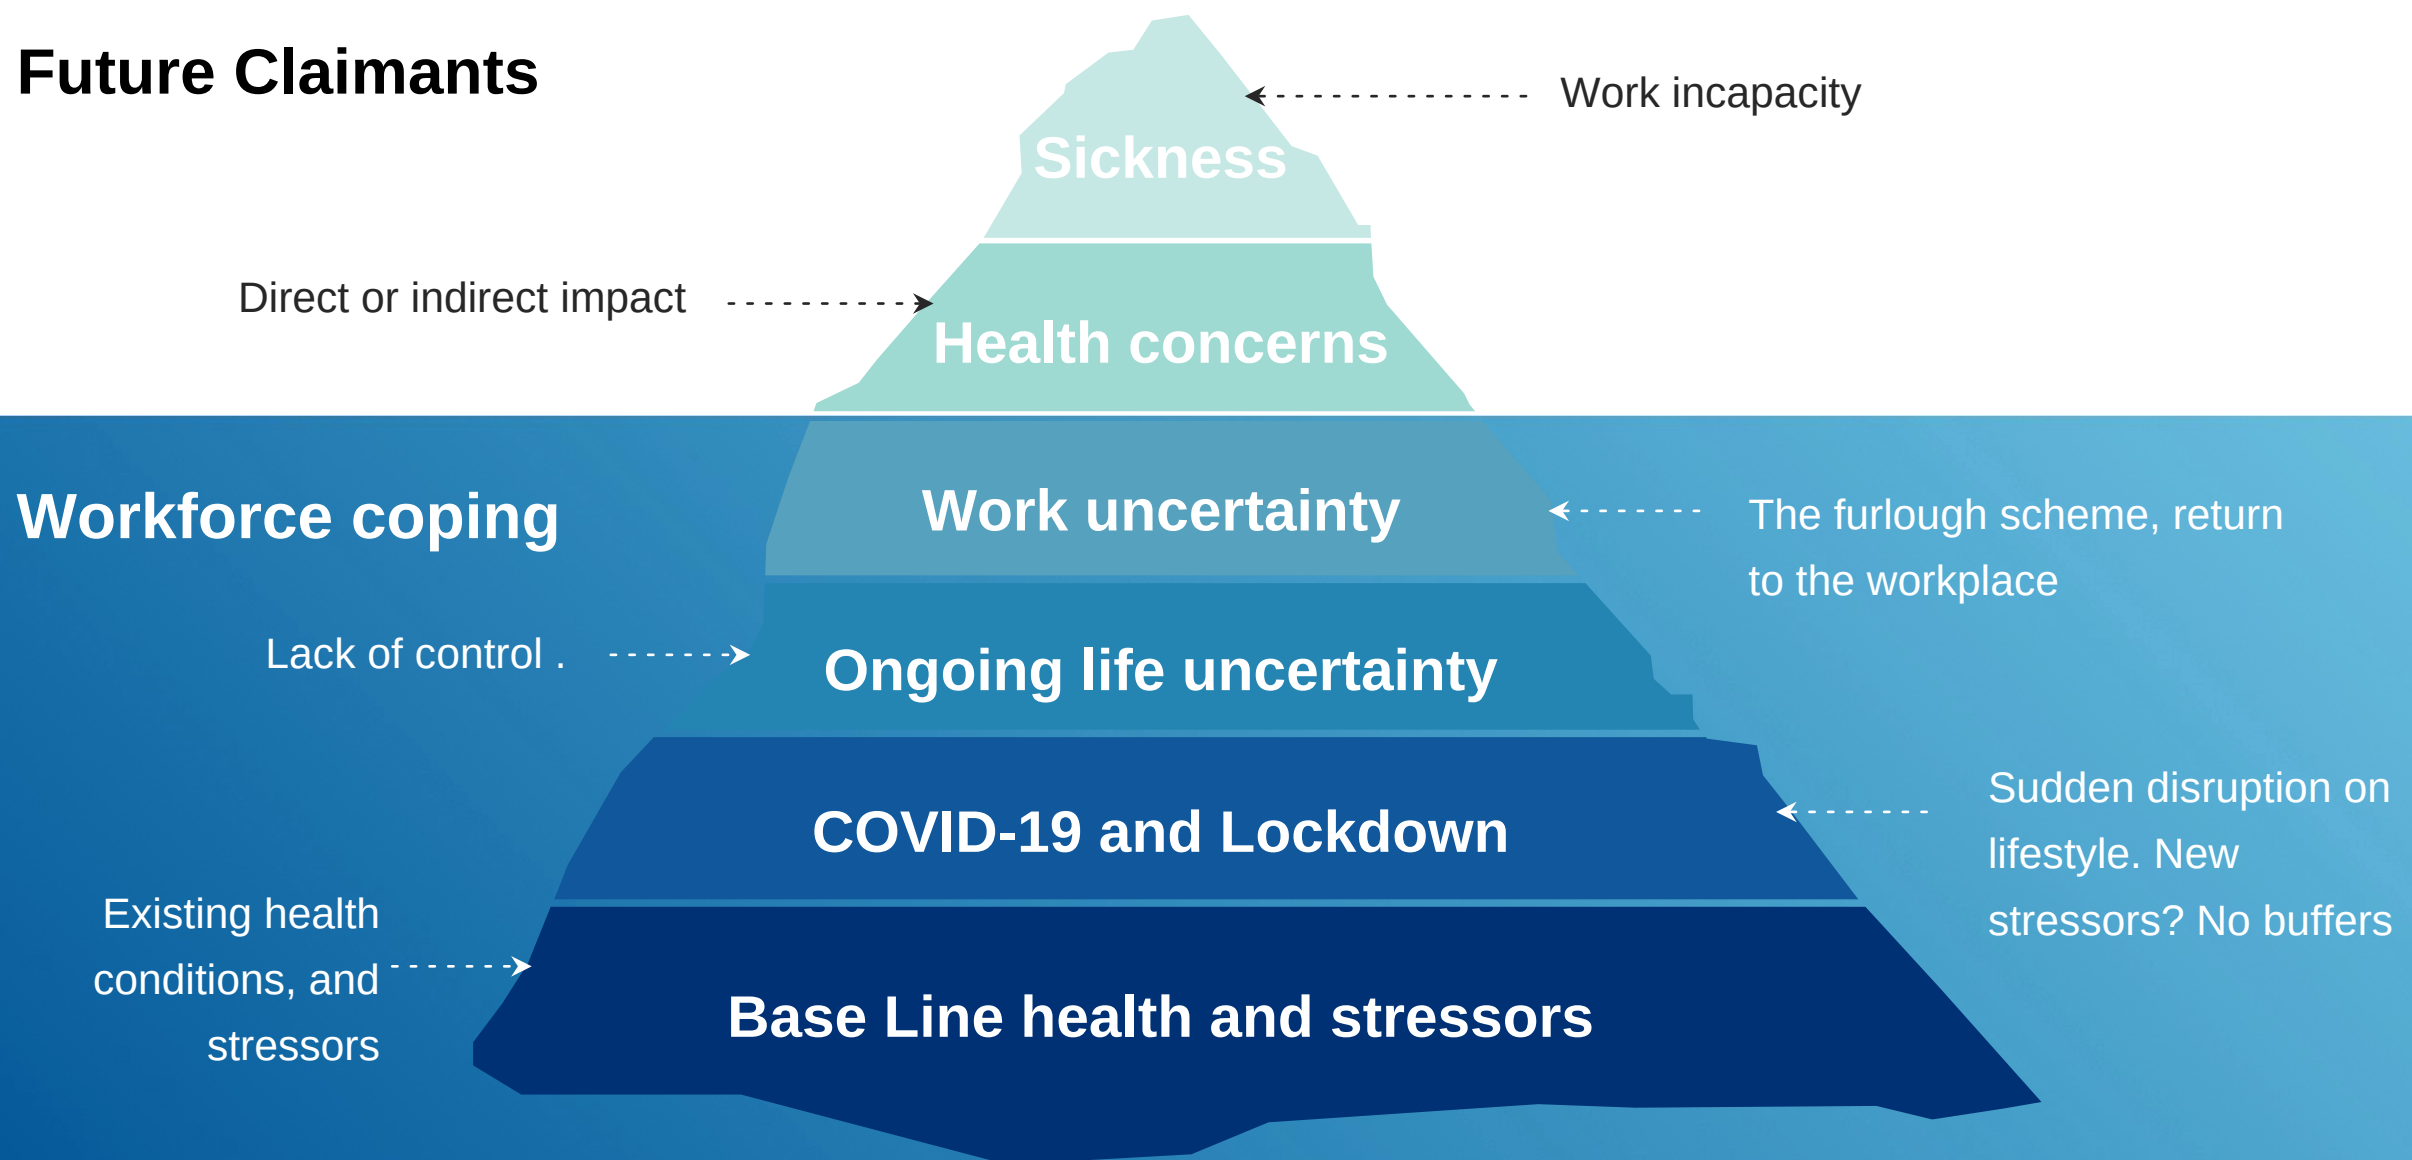

4

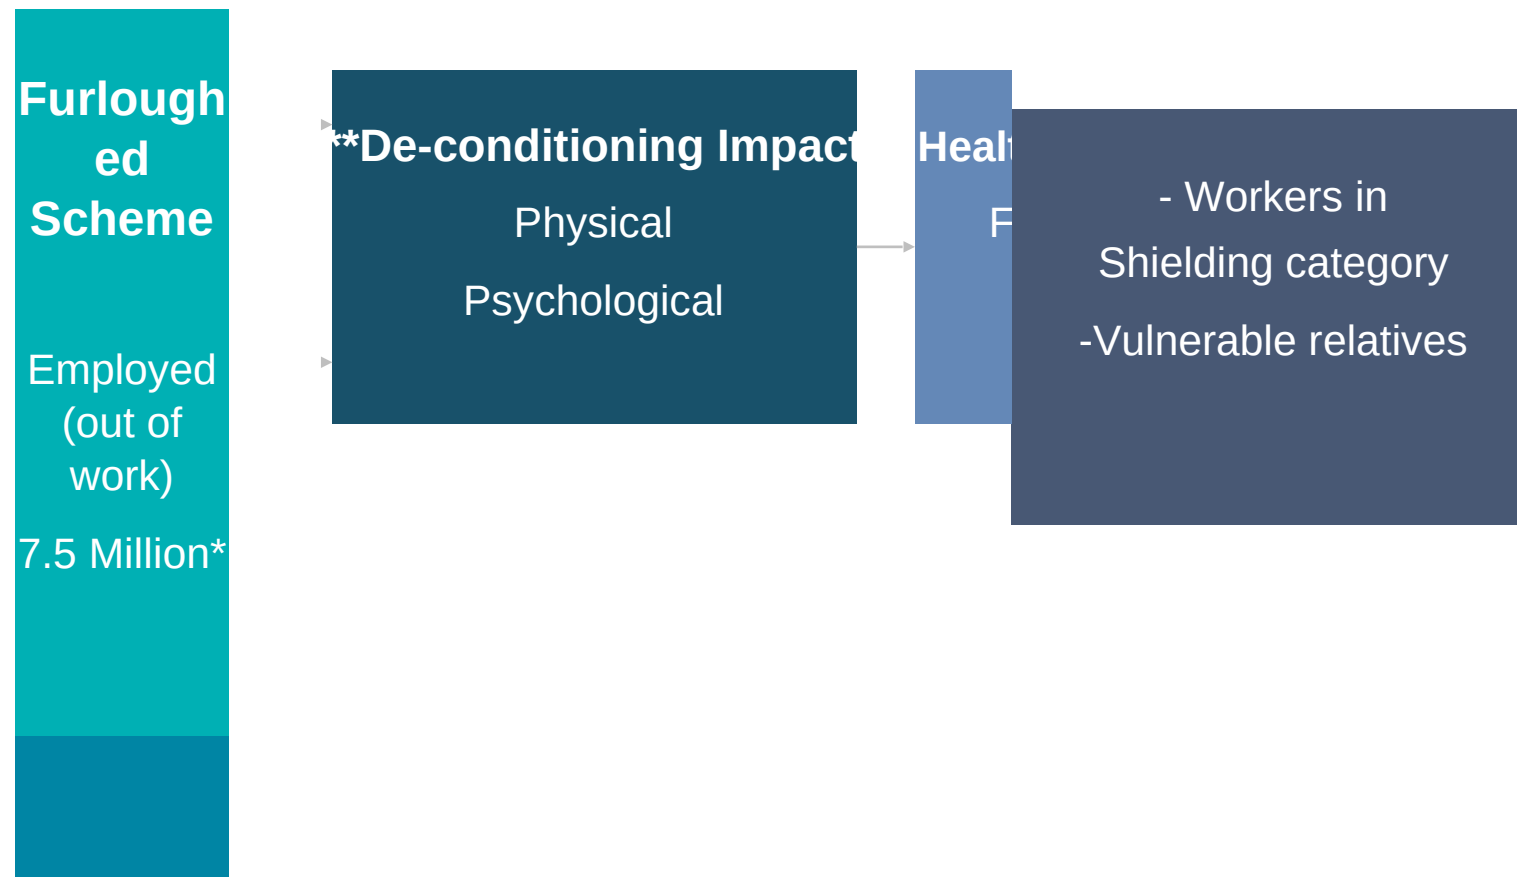

Closing thoughts and questions

Summary of key points discussed .

THE COVID-19 ICEBERG

Future Claimants

Unemployment

3.9 % *

Management

Employee groups

Government

WORK READINESS

National Statistics

(ONS) <https://www.ons.gov.uk/employmentandlabourmarket/peopleinwork/unemployment>

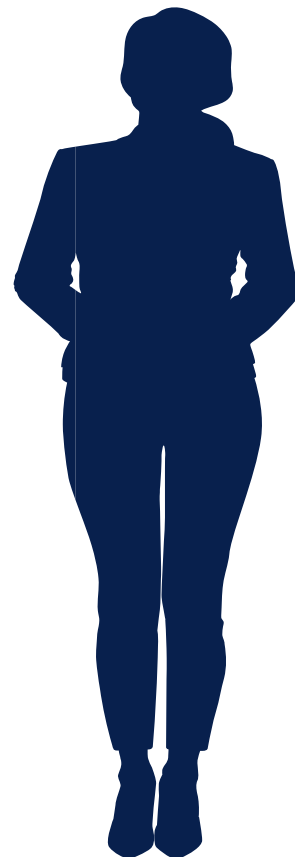

** Black, C and Frost D (2011) Health and work and Independent Review of sickness absence

CASE STUDY

5

Hairdresser

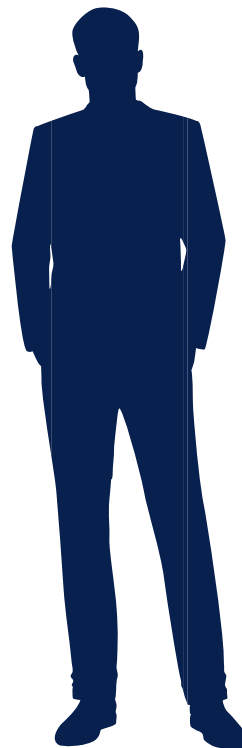

- 37yo Female
- Self-employed
- Salon shut down in March-20
- IP Claim for stress/anxiety and depression
- Business closed down now

CASE STUDY

Window Fitter

- 42yo Male
- Pulled his back
- Four week deferred period
- Fit note for 8 weeks

Had one GP consultation
over the phone

No treatment in
place, other than
paracetamol and
ibuprofen for pain.

No evidence of functional
capabilities and limitations

Will my IP claim be paid?

WHITE VS MANUAL OCCUPATIONS

7

Traditional risks

Work stress (e.g doctors*) vs musculoskeletal injuries.

COVID-19

** Exacerbated mental health symptoms.

Remote working

Workplace infection risk fears.

Access to treatment

NHS pressures, and lack of patient contact.

* British Medical Journal. <https://www.bmj.com/content/369/bmj.m2192>

**Office for National Statistics (ONS) <https://www.ons.gov.uk/peoplepopulationandcommunity/wellbeing/articles/coronavirusanddepressioninadultsgreatbritain/june2020>

Future IP claims risk landscape

Mental health claims

Primary cause/co-morbid new claim, expect all occupations to be impacted, particularly medical professions.

Life style related conditions

Co-morbidity: Diabetes, high blood pressure, obesity.

Ageing population

Work stress, technology overload, existing health conditions.

More complex claims

The prevalence of complex bio-psycho-social new claims is likely to increase.

- More than 1 diagnosis, plus existing conditions
- Worsened symptoms, due to delays in treatment

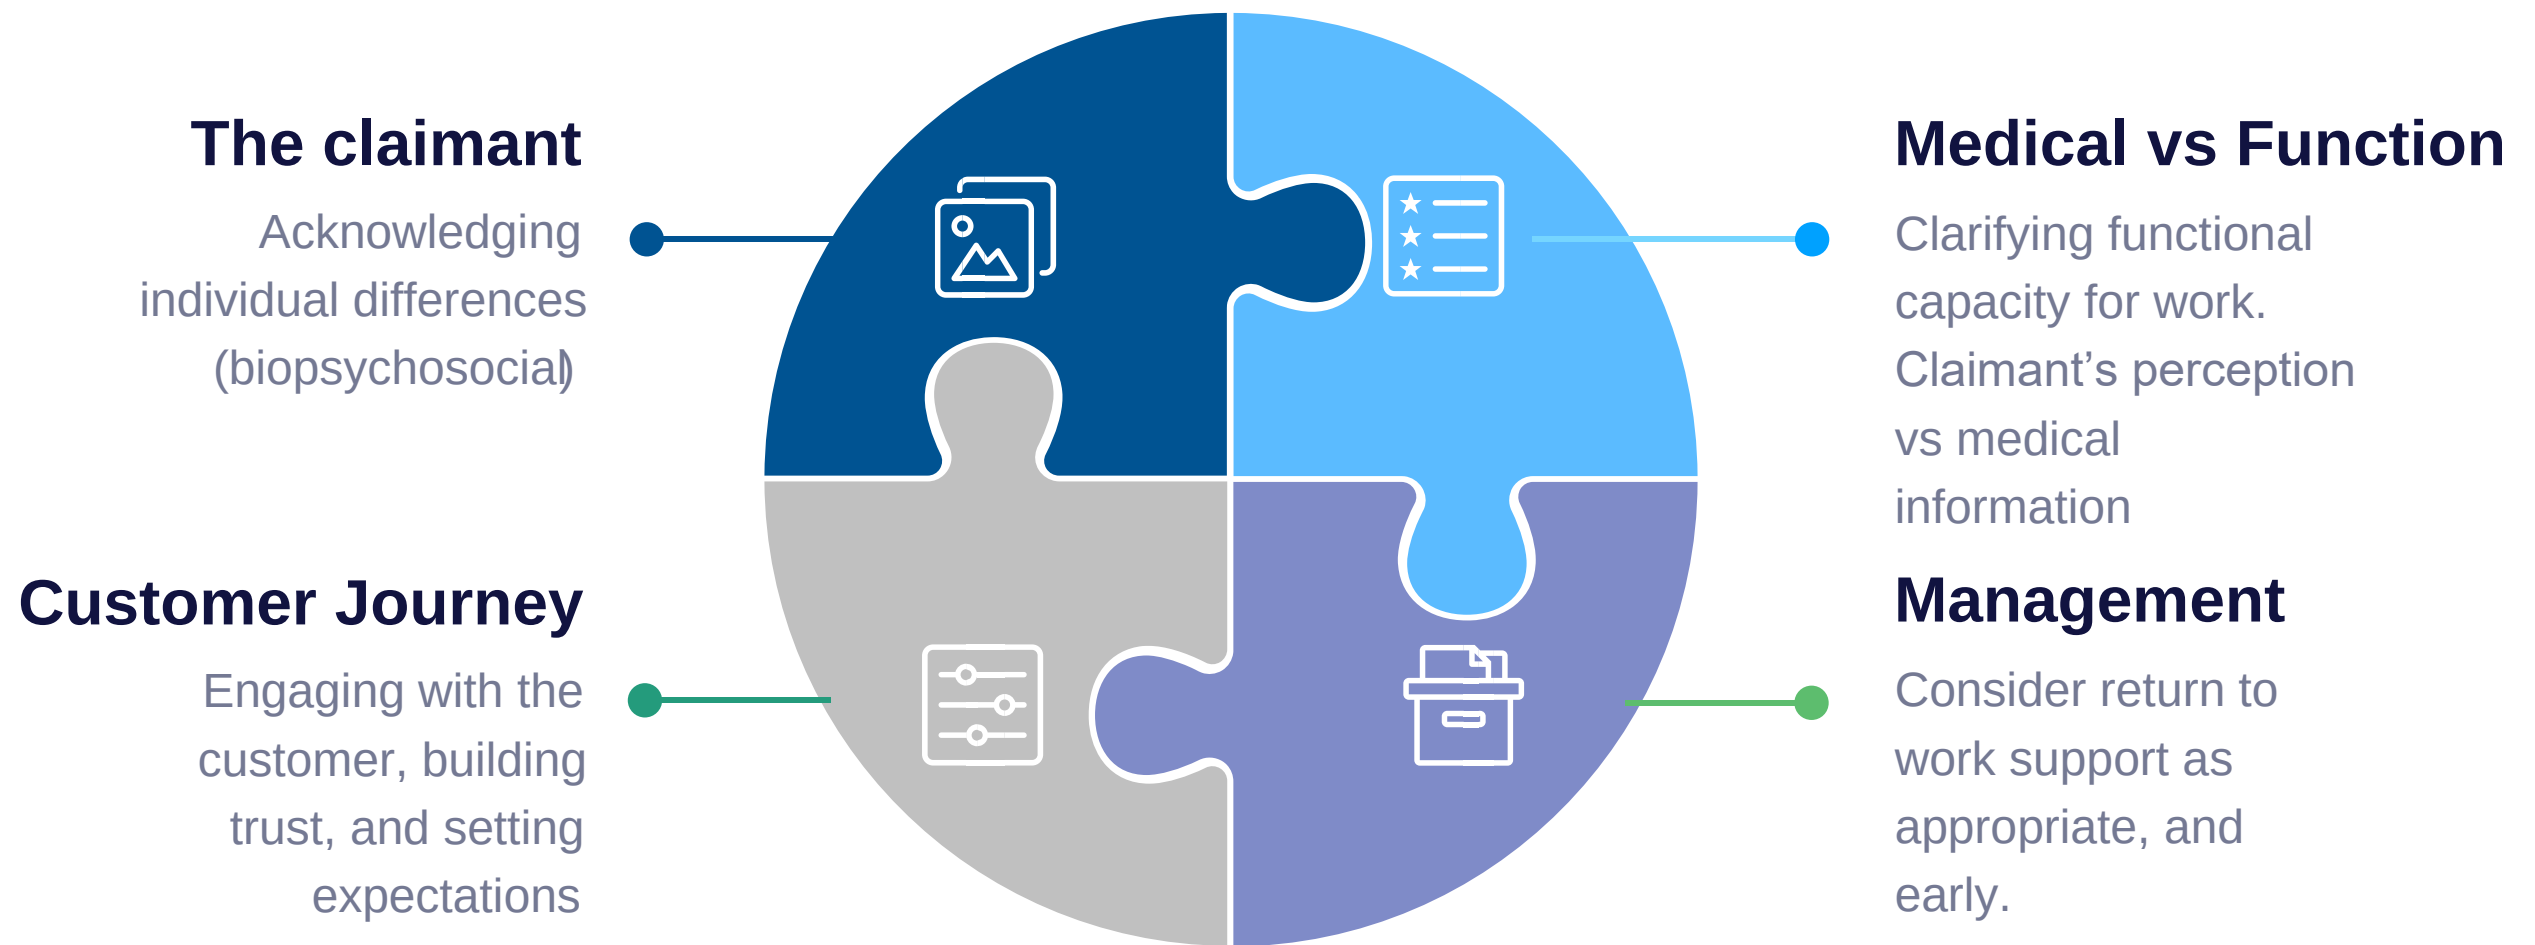

- Work stress and social factors

HOLISTIC CLAIMS MANAGEMENT
