Death Claims Abroad A Specialism within a Specialism

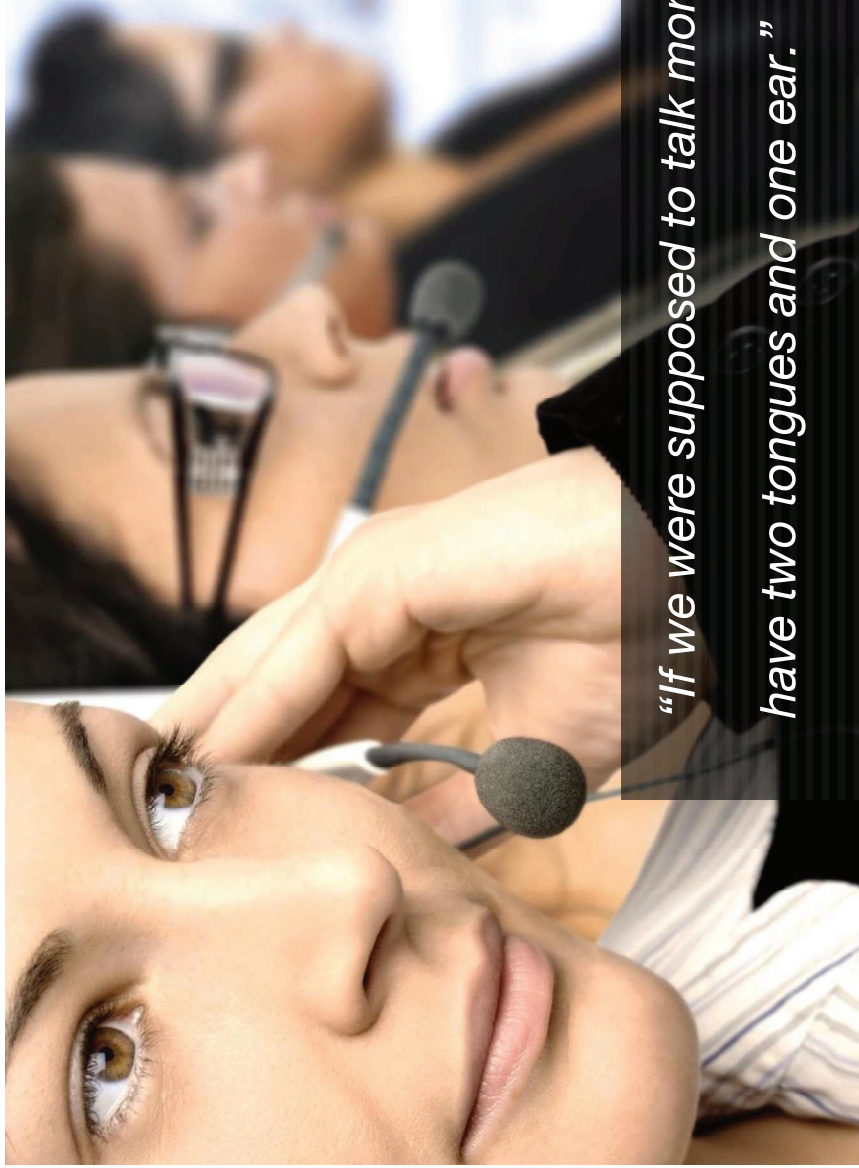

Better, Informed

- Largest global investigation company
- Global reach with local knowledge
- Specialist in early intervention and risk management
- Technology integrations
- Streamlined processes
- Strength in general and complex investigative strategies

Background

First Notification of Loss

“If we were supposed to talk more than we listen, we would have two tongues and one ear.”

Mark Twain.

First Notification of Loss

All insurers must have a formal action plan detailing “Standard Operating Procedures” between the Assistance Company and the Claims Department when a major loss occurs.

Communication is the Key. A clear line of communication will ensure the claims department has a distinct and often, a strategic advantage to authorise an immediate investigation into the incident.

Of course, not all major accidents need investigating and the ultimate decision will depend on a number of factors which are detailed in this presentation.

Decisive Action Drives Informed Decisions

- Show Empathy
- Engage & Listen
- Build Rapport
- Earn their Trust
- Let caller tell their Story
- 80% should be the Caller
- Ensure you take detailed notes
- Assess, Evaluate and Act
- Refer to the Red Flag Guidelines
- Review Internal SOP's
- Potential Exposure/Costs
- Liaise with Team Leaders

Red Flags

FNOL - Key Indicators

Primary Indicators for Immediate Referral

- The incident occurs after 7pm and before 5am
- Was the driver or/passenger in a motor vehicle
- Was a pedestrian when struck by a vehicle/bike/other
- Was the rider/pillion on a motorbike/scooter/moped
- Insured was in a boat/Jetski
- Insured was riding or as a pillion on a snowmobile
- Participating in parasailing/paragliding
- Partaking in an extreme sporting activity
- Equipment failure blamed for any of the above
- Recovery Options re boat sinking, rental defect etc
- Ever changing version of incident/events

Tour Groups

- Part of an organised tour (Top Deck/Contiki etc)
- Late night Incident - (Travel by day Party by night)
- Meets established criteria (major falls/nightclub/bars)

First Notice of Loss (Vehicle Accidents)

Key Questions to Ask

- When did it occur
- What happened – Full description of the circumstances
- Where did it happen – Precise details of streets, intersections
- Was the insured a driver/passenger/pedestrian?
- What safety precautions did the insured obey (seatbelt, helmet etc)
- Who were involved
- Full details of all parties including registration, licence and witnesses?
- Who was at fault – Statements from witnesses?
- Were alcohol or drugs a contributing factor?
- Were the police called – which police station?
- Was the insured licensed to drive the vehicle involved in the accident?
- Did the insured have to provide a copy of their license to rent the motorcycle?
- Was the insured required to wear a helmet in “that” country?

Decisive Action Drives Informed Decisions

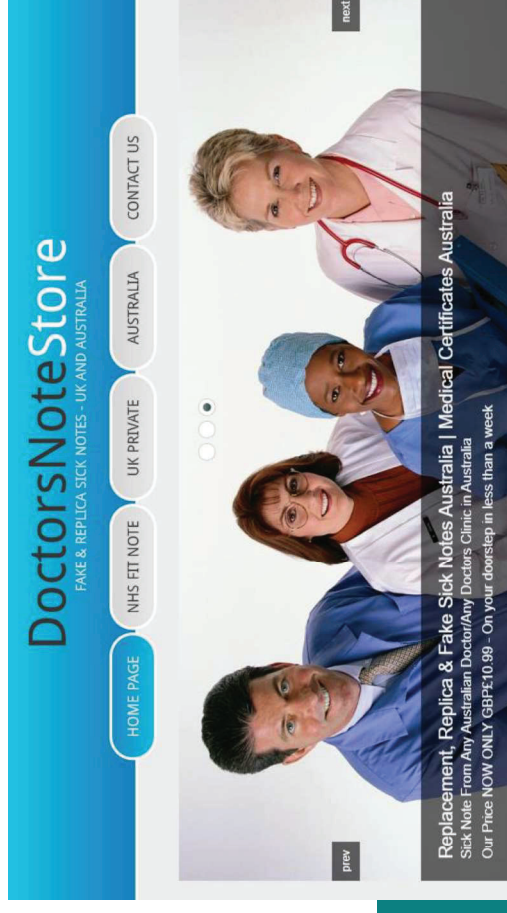

All insurers must have a formal action plan detailing “Standard Operating Procedures” between the Assistance Company and the Claims Department when a major loss occurs.

Communication is the Key. A clear line of communication will ensure the claims department has a distinct and often, a strategic advantage to authorise an immediate investigation into the incident.

Of course, not all major accidents need investigating and the ultimate decision will depend on a number of factors which are detailed in this presentation.

The Global Problem

- Assessor knowledge gap in the market
- Awareness of technology and it's ability (i.e. documentation)
- Lockdown and travel
- High risk countries and corruption
- Specialist resources uncommon

24 Fake Doctors Note Templates

Below you'll find the best doctor's note templates and medical excuse notes in suitable formats, such as Word doc and PDF. You can fill in the blanks on your computer or with a pen.

The 3 x F Words!

4. The false Death Certificate

The Translation Provided by the Claimant's family for the Death Certificate is all correct except translating the **Forensic Medicine Institute as Forensic Medicine Hospital**. We believe the reason for this incorrect translation is as follows:

In Arabic, hospital is called *Mustashfa*. It is normally abbreviated with the first letter [ح] In Arabic, institute is called *Ma'ahad*. It can be abbreviated with the first letter [م].

On this death certificate it has been abbreviated which obviously made the translator think it was an abbreviation of *Mustashfa* and translated it as Hospital.

There is no hospital in Iraq known as Forensic Medicine Hospital.

The abbreviation of the word Institute in Arabic

NOTE: Place of Death can never be the Forensic Medicine Institute.

It can be at home, hospital, etc. On this death certificate, the place of death is the Forensic Institute which is not possible.

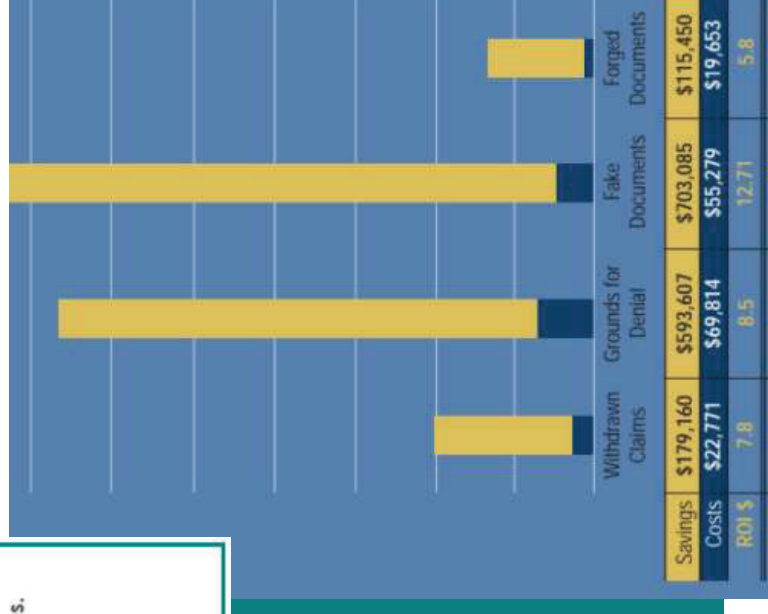

KEY BENEFITS

- (+) Trusted Expertise.
- (+) Operational Efficiencies.
- (+) Accountability.
- (+) Cost Savings.
- (+) Global Resources.

The Solution

- International investigative reach and expertise
- Specialists in death claims
- Early intervention expertise
- Intelligence led
- Field and virtual technology solutions
- Systems that combine data & intelligence
- Document validation based on experience
- Matching fake documents, fictitious clinics, doctors and billing providers

The Digital World

- Cuts claim lifecycles by 50%
- Faster Outcomes
- Compatible on all devices
- Location no issue!
