POSITION

Clinical Specialist

JOB PURPOSE

- ❑ The role requires a flexible proactive self starter who is a trained medical professional specialising in the area of mental health. The successful candidate needs to be adaptable to work alongside the claims team helping to deliver consistently excellent service to our clients.
- ❑ By providing consistently excellent service in :
 - The development of claims assessors knowledge to meet best practice standards in return to work, vocational rehabilitation, clinical assessment and clinical rehabilitation
 - Initiate analysis of global medical and rehabilitation research and trends and advise of its impact/relevance for claims management initiatives in the UK. Initiate and lead the project management to implement relevant initiatives.
 - Initiate analysis of relevant insurance data to assist with risk management and /or identification of future risks and opportunities for Swiss Re.
 - Work alongside the claims team to identify, develop and deliver clinically focussed services to clients that are inline with the client strategy.
 - Provide support to the clinical manager in the negotiation and influence in changes to best practice when appropriate
 - Sound technical decisions
 - Delivery of training to clients and industry groups
 - Maintain a comprehensive understanding of rehabilitation providers and stay abreast of

developments within the rehabilitation industry.

KEY ACCOUNTABILITIES

- ❑ Reviewing of insurance cases and providing guidance on best practice standards in clinical assessment, treatment, rehabilitation and vocational rehabilitation.
- ❑ Identification of appropriate cases for rehabilitation; refer for and monitor rehabilitation to optimise claims management outcomes
- ❑ Proactively maintaining an up to date knowledge of clinical and rehabilitation developments.
- ❑ Identifying when rehabilitation developments may be a risk or opportunity for Swiss Re, communicating this to relevant stakeholders along with recommendations for management strategies.
- ❑ Proactively identifying opportunities for clinical / insurance data analysis or projects, developing a business case, and when appropriate coordinating and delivering projects within deadline.
- ❑ Building and maintaining relationships with rehabilitation providers.
- ❑ Proactively liaising with rehabilitation providers to ensure the Swiss Re clinical team has a good understanding of providers and services within the UK.
- ❑ Attending rehabilitation networking events to ensure awareness of developments within the rehabilitation industry.
- ❑ Building and maintaining relationships with all clients and internal stakeholders.
- ❑ Liaison with claims team to ensure best practice is consistent across the client's claims books. Problem solving if and when best practice is not being adhered to.
- ❑ Developing, co-coordinating and delivering clinical training to the claims team, other internal stakeholder, external clients and the industry.

Transfer of knowledge and experience to relevant internal stakeholders

KEY SKILLS, KNOWLEDGE, QUALIFICATIONS & EXPERIENCE

- ❑ Appropriate Graduate education in a relevant medical field (e.g. Psychology, Occupational Therapy etc)
- ❑ Experience providing clinical rehabilitation
- ❑ Experience working with a private rehabilitation provider, within an insurance setting or in occupational health
- ❑ Experience in clinical/ rehabilitation/ case management service development and in implementation of services
- ❑ Experience in managing projects including identification of need for project, development of business case, leading and coordinating project to deliver within deadlines

Excellent medical, occupational, functional technical knowledge relevant to clinical claims management and assessment

- ❑ Awareness of Swiss Re structure
- Ownership
- Innovative and proactive
- Excellent interpersonal skills
- Strong written and verbal communication skills
- Negotiation and influencing skills
- Analytical skills
