**POSITION**

Claims Expert

**JOB PURPOSE**

The Technical Claims Consultant is responsible for maintaining Swiss Re's risk profitability through identifying and driving key client claims strategies, maintaining sound claims management practices and provision of service excellence to clients.

**KEY ACCOUNTABILITIES**

- Key external client contact and internal SME for aligned key clients.
- Monitoring at a macro level for aligned key clients the reinsured claims portfolio to detect trends and issues affecting our results. Deliver to our Internal claims team leaders/Claims Managers and external parties solutions to address these; and monitor impact and report outcomes.
- Holding quarterly external and internal claims client strategy meetings for key clients, bringing in all disciplines as required (claims, actuarial, underwriting, product, client markets)
- Planning the delivery of client claims service at levels appropriate to the business through aligning the interests and efforts of both parties and building positive relationships;
- Planning and conducting aligned key client claims audits, oversees and/or assists client in any remedial actions to improve claims standards
- Review of any tender activity, product development and treaty reviews for aligned clients, share outcomes/knowledge with CSI and technical team.
- Supporting the Team Leader/Claims manager in developing and implementing changes to philosophy and best practice standards across all business lines.

- Liaison with the assessment team in the implementation of portfolio management strategies in line with client plans
- Liaison with all disciplines e.g. actuarial, underwriting etc, and utilising information in the management of claims and clients
- Promoting SRLH technical claims expertise and profile in the market and specifically to key clients, global CLM and the wider business;
- Lead market practice through specific inclusion in industry bodies and to raise a positive SR presence in the market.
- Contributing to business initiatives and projects ensuring relevant claims issues are considered in broader based company activities
